◎ Career Objective

Aspiring **Fullstack Developer** with more than 7 years of experience in software development and enterprise solutions. Skilled in building applications using **C#, ASP.NET Core, React, Python, and SQL**. Experienced in developing customized solutions integrated with **SunSystems** and **Infor Mongoose**. Seeking opportunities to leverage technical expertise while continuously learning soft skills and advanced technologies to grow into a professional Fullstack Developer.

⚒ Skills

Technical Skills:

- Backend: C#, ASP.NET Core 8.0, Python
- Frontend: React, JavaScript, HTML, CSS
- Database & Reporting: SQL Server, SSRS, SunSystems integration
- Tools & Platforms: Docker, Git, API Gateway, Windows Service, VBA for Excel automation
- Others: Microservices Architecture, Payment System Integration

Soft Skills (developing):

- Team collaboration
- Problem solving
- Willingness to learn & adapt

Languages:

- Vietnamese: Native
- English: Intermediate (working level, aiming for IELTS 5.0)

🗂 Work Experience

Software Developer
TRG International – Ho Chi Minh City, Vietnam
Nov 2017 – Present

- Developed and deployed **TEBIS**, an e-payment solution integrated with SunSystems, successfully implemented for multiple clients.
- Built and optimized **VAS reports** using SSRS for diverse customer needs.
- Designed and implemented **automation tools**:
  - Windows Service to read and import data from multiple sources into SunSystems via API.
  - VBA scripts for Excel to automate repetitive tasks for end users.
- Collaborated with internal teams and clients to troubleshoot, enhance, and maintain enterprise systems.

🎓 Education

University of Transport and Communications – Ho Chi Minh City
Bachelor of Information Technology, 2017

📜 Certifications

- English Certificate A1 & internal English training at TRG
- Online programming courses (freeCodeCamp and others)
